THE NUTRI-SPEC LETTER

Volume 28 Number 7

From:

Guy R. Schenker, D.C.

July, 2017

Oh NO!!

SEA MONSTERS!!!

Dear Doctor,

THEY ARE EVERYWHERE!

In your flow chart study of **Dis-Ease = INFLAM-AGING** you have begun to recognize all the ...

TSUNAMI OF IMMUNONEUROENDOCRINE STRESS ...

that bubble up from deep within the ...

OCEAN OF MOTION ...

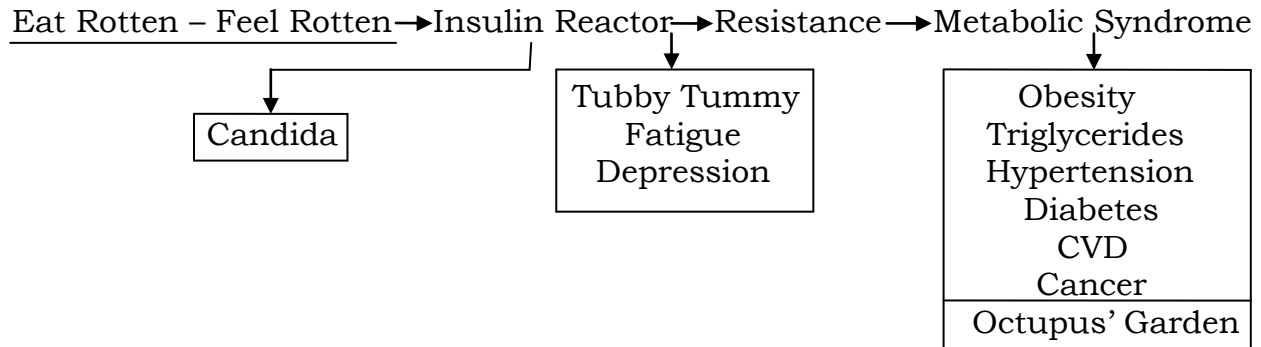

churning beneath the surface of all your patients. The explosive potential of each tsunami builds until it erupts as a massive wave of pathology. --- Pity your patients ---who never knew what hit them. --- And pity those patients' poor doctors, haplessly navigating these treacherous waters with no NUTRI-SPEC to guide them. As a patient's life is being washed away in a flood of misery, what do those doctors have to offer? Nothing more than tossing the patient silly little life preservers (drugs) --- barely adequate to keep the patient's head above water as he is washed away.

With any luck --- half drowned and half eaten by Sea Monsters --- these patients find their way into your office.

The most ubiquitous of all Sea Monsters loves to munch on your patients who are ...

INSULIN REACTORS.

Which patients are those? Nearly all of them! At least two thirds of your patients age 33+, 80% of your patients age 43+, and 90% of your patients age 53+ are trapped in the life-sucking whirlpool ...

Yes, nearly all your patients are being pulled under by Insulin Resistance.
 --- What are you doing about it? Seriously, ask yourself ...

WHAT ARE YOU DOING ABOUT IT?!!!

Yes, pity your poor patients! Not only are they being gobbled up from below by a Sea Monster, they are being attacked from above by the Mindless Medicine Men pushing them under with antidepressant drugs, blood pressure drugs, and statin drugs. What are you doing about it?!!! You could be (should be) building an entire practice on serving your Insulin Reactors with Metabolic Therapy.

What a staggering statistic --- there are 6 times as many diabetics in America now as there were in 1980. Where did this epidemic come from? Was the American population infected by some mysterious virus? Are our bodies being insidiously possessed by invisible aliens from a distant galaxy? --- How can the medical profession be totally lost at sea when the direction of the current flow is so obvious?

What should YOU be doing about it? What must you do about it? --- It is simple. Eagerly hop aboard your submarine and do a quick Deep Sea Exploration for each of your Insulin Reactors. Literally in minutes, after ...

- taking your investigative history,
- singing your “You Are an Insulin Reactor” song,
- doing whatever NUTRI-SPEC testing you do,

- then, speaking the magic words, “Your (fatigue/depression/tubby tummy/high blood pressure/boogey head/high cholesterol) is not your problem, it is a result of your problem” ...

You will have discovered, and be ready to reverse, all the Immuno-NeuroEndocrine stresses feeding into, and out of, your patient’s Insulin Reactor vicious cycles.

--- In no time, your patients will be off their antidepressants, off their statin drugs, and either off or at least minimizing their blood pressure medications --- all the while their energy sky rockets and their tubby tummies begin to vanish.

How can you be certain of such phenomenal success? --- A doctor Eric Westman at Duke University has been studying a low carbohydrate (ketone-generating) diet on Type 2 Diabetics for several decades. He has more than 3 dozen studies published in the Literature. The Westman low carb diet is virtually identical to old Atkins Diet that the medical profession poo-pooed during years and years of calling Atkins a quack --- despite his undeniable countless successes. But now Westman, an unquestionably “legitimate” researcher, is duplicating all of Atkins’ “miracle cures”, and then some.

To date, Westman has over 1,000 Type 2 Diabetics off their medication entirely. But not only are they off their diabetic medication, many of them are also off their blood pressure medicine. They have all lost tremendous amounts of weight --- most of it off the tummy. And what other symptoms have improved dramatically in all Westman’s subjects? --- Just look back at your Ocean of Motion Insulin Reactor Flow Chart. --- As you would expect, Westman’s subjects also score better on decreasing triglycerides, decreasing cholesterol, decreasing fatigue, and decreasing depression.

Westman has also contrasted the low carb diet (the dietary recommendations you should be giving to all your Glucogenic and Parasympathetic patients, as well as all your overweight Anaerobic and Ketogenic patients) with the low fat, low calorie diet recommended for the last 50 years by all the “experts”. If the low fat, low calorie sufferers lose weight, they do so with great suffering, and then tend to gain it back very quickly. They also show little to no improvement in blood pressure, depression, fatigue, or triglycerides.

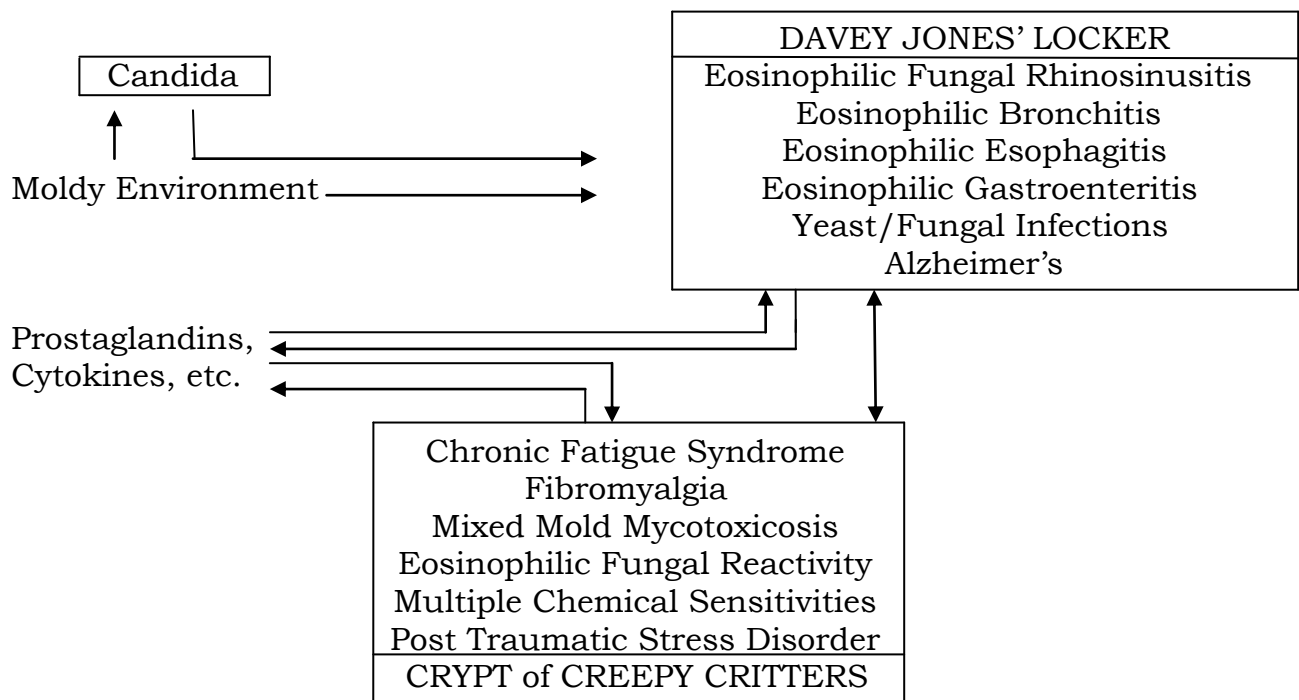

If Westman can achieve such amazing clinical results by nothing more than an ultra low carb diet (with the additional provision that 1/3 of the daily protein intake be consumed at breakfast), imagine what you can do by giving your patients similar dietary recommendations, but accompanied by NUTRI-SPEC supplements. You know your Immuno-Synbiotic supplements specifically light a fire under the Gut-Hypothalamus Axis, the Gut-Liver Axis, the Gut-Pancreas Axis and the Gut-Adipose Axis. You know all your other

NUTRI-SPEC supplements are designed to improve the efficiency of energetic metabolism. So, you can give your patients all of Westman's results, but in much less time. Yes, only you can reverse the **Dis-Ease = INFLAM-AGING** aspects of Metabolic Syndrome and Type 2 Diabetes.

--- So simple. --- If you are wasting your time and your patients' money on anything else, then you are cheating yourself out of the chance to be truly rich.

Now, since you can so easily slay the Sea Monsters associated with Insulin Resistance → Metabolic Syndrome, it is time to turn your attention to the ...

MORE MYSTERIOUS CREATURES OF THE DEEP ...

You must direct your submarine exploration to DAVEY JONES' LOCKER. Here you find ...

THE SLIMIEST ...

the sneakiest, and the most parasitical of all Sea Monsters. This dark damp cavern is crawling with Candida, mildewy with mold, and filthy with fungus. -- Yuck!

Countless Sea Monsters launch their attack from DISGUSTING DAVEY'S LOCKER. Obvious among these are the yeast/fungal infections of the skin, and the mucous membranes of the sinuses, throat, esophagus, GI tract, and genital-urinary tract. These infectious Sea Monsters are a nuisance, and

plague many of your patients. The INE vicious cycles elicited by these infections can cause an explosion of prostaglandins, cytokines, ETC. --- thus precipitating a myriad of symptoms seemingly unrelated to the slimy infection.

But the Yeasty Beastly infections are nothing compared to the **Dis-Ease = INFLAM-AGING** stressors caused, not by a frank infection, but simply by an immune system's over reactivity to the yeast/mold/fungal antigens --- or --- in response to the overwhelming toxic load of mycotoxins. ----- Recall two of your favorite NUTRI-SPEC songs --- "1 out of 4" and "1 out of 6". 1 out of 6 of your patients are genetically predisposed to produce an Immunoglobulin-G-mediated superantigen response to even minimal exposure to mold spores or mold fragments. 1 out of 4 of your patients are genetically deficient in the liver capacity to detoxify and eliminate mycotoxins. In these 1 out of 4 and 1 out of 6 of your patients ---

GARGANTUAN SEA MONSTERS ---

are spawned. The erupting deep water volcanoes of prostaglandins, cytokines, ETC. is totally overwhelming --- severely disrupting each of your patient's Ocean of Motion.

Is your patient taking repeated antibiotics for "sinus infections"? --- What he really has is Eosinophilic Fungal Rhinosinusitis. Is your patient failing to overcome her "asthma" despite taking 3 asthma drugs? --- What she really has is Eosinophilic Bronchitis. Is your patient risking osteoporosis and heart attack by taking a proton pump inhibitor for his GERD? --- What he really has it Eosinophilic Esophagitis. Is your patient jumping from one remedy to the next to control her "Irritable Bowel Syndrome"? --- What she is really suffering from is Eosinophilic Gastroenteritis.

IS YOUR PATIENT ONE OF THE 1 IN 9 WHO WILL SUCCUMB TO ALZHEIMER'S?

Sadly, your patient is drowning in DAVEY JONES' LOCKER.

But --- the sinus infections, the asthma, the GERD, and the IBS, are just the tip of the iceberg. The monstrous iceberg hidden just beneath the waves on the surface of the sea constitutes ...

ONE MASSIVE DEGENERATIVE DIS-EASE COMPLEX ---

--- the myriad of vicious cycles swirling through each of these patient's Ocean of Motion. The key to slaying these slimy Sea Monsters is understanding prostaglandins, cytokines, ETC.

ETCETERA? --- Oh NO? ----- We closed last month's Letter by offering you two free bottles of Taurine for venturing your guess on what particular Sea Monster might be represented by "ETC". To all the thoughtful guesses you offered, your friendly NUTRI-SPEC staff member replied "I will pass your guess along to Dr. Schenker --- but he will not even tell us what the answer is. He also says he is 99% certain no one will guess correctly. So --- his response to anyone who guesses is, 'NO! --- N-O --- NO!'"

Turn back two pages and look deeply into the CRYPT of CREEPY CRITTERS. There, you will find the six GARGANTUAN SEA MONSTERS spawned within Davey Jones' Locker. Two of those gargantuan critters are the Eosinophilic Fungal Reactivity and the Mixed Mold Mycotoxicosis representing all the vicious cycles swirling to and from Davey Jones' Locker. But look at the other four inhabitants of this mysterious crypt.

Do you have patients with Chronic Fatigue Syndrome? With Fibromyalgia? How do you handle these patients? How does any doctor handle these patients? The causes and effective treatment of these conditions have eluded medical researches entirely. Physicians throw an assortment of pathetically inadequate life preservers to these patients. Alternative healthcare practitioners throw every conceivable herbal and other "natural" remedy into the mix --- and no one has come close to solving these mysteries.

Do you have patients who suffer "attacks" of mental fog, incapacitating fatigue, vertigo, and GI distress? === Multiple Chemical Sensitivities --- another medical mystery. Is it any wonder most doctors, including perhaps you, say "Oh NO!" when confronted with one of these mysterious patients?

But here is the big news. --- With NUTRI-SPEC the mystery is solved --- the gargantuan Sea Monsters can be slain. Within your **Dis-Ease = INFLAM-AGING** Flow Chart you will find the power to save your patients from these mysterious maladies. The key is in all the vicious cycles that swirl about the word ETC. So, let us continue our guessing game another month ...

CLUES: Instead of saying "Oh NO!", say "Oh, N-O!" What does N-O stand for? Take a guess when you call, fax, or email your next order to NUTRI-SPEC. But this time you must guess correctly to get the prize --- **two free bottles** --- your choice of TAURINE, OXY MAX, ADAPTO-MAX, or any of the three IMMUNO-SYMBIOTICS. Never again say "Oh NO!" in the face of even the nastiest Sea Monster. With NUTRI-SPEC you can cruise through every patient's Ocean of Motion with the power to quell all tsunami of INE stress.
